October 2020

West Side Reservoir Project:

Construction Beginning October 2020

Crestline Construction was awarded the bid for Phase 2 of the West Side Reservoir project for \$3,934,250.00. Phase 2 is the construction of a 500,000 gallon reservoir on the west side of the District and construct approximately 13,000 feet of 10" and 12" transmission main that will replace two very long, aging, dead-end, 1" and 2" diameter mains. The reservoir and main improvements will improve local hydraulics (reduce head loss/ improve pressures) in the most heavily developed (residential, commercial, and industrial) part of the District by feeding the water system from the west in addition to the east.

Crystal Springs Water District Hydrant Maintenance Program

Fire hydrant flushing may cause temporary inconveniences such as a reduction in water pressure and aesthetic issues such as discoloration of the drinking water. Discolored water poses no threat to the public's health, but it will stain laundry and if consumed may have an unpleasant taste. Residents should be certain all discolored water is out of their home's plumbing and hot water heater prior to laundering clothes or drinking. If you notice discolored water coming from your fixtures please flush the cold water side for approximately 5 minutes.

Although residents may experience some temporary inconveniences, the flushing program is necessary to maintain a good water supply for both firefighting and domestic purposes. Your cooperation with this program is appreciated. If you experience continued loss of pressure or water discoloration, please contact the office at 541-354-1818.
